Re: C3[™] CMS Software update

C3[™] CMS Software update

Affecting model numbers: Windows-based C3 CMS

New firmware version: v1.1.4.76

Current firmware version: v1.1.4.73

Release date: 09/27/2021

NEW FEATURES

C3 CMS Client

- Added Fisheye camera type to Camera Settings options.
 - Available Camera Detail (installation type) setting options include:
 - Ceiling – for ceiling mounted fisheye cameras; allows a fisheye image to be dewarped into a wide panoramic image; appears similar to a 180° stitched view.
 - Table – for tabletop positioned fisheye cameras; allows a fisheye image to be dewarped into a wide panoramic image; appears similar to a 180° stitched view.
 - Wall – for wall mounted fisheye cameras; allows a fisheye image to be dewarped into a 4:3 aspect ratio image.
 - Added ‘fish’ symbol for fisheye toggle in channel window; replaces PTZ toggle when set to ‘Fisheye’ camera type.
 - Digital zoom controlled by mouse wheel and/or click/drag.

Additional Notes

- C3 CMS v1.1.4.76 is currently for Windows OS release only.
- Click [Here](#) to download the updated C3 CMS software file
 - To update existing installations, run the C3 CMS installation wizard
